SUMMARY

Computer Science graduate with two years of part-time Microsoft Dynamics 365 Finance and Operations development and 2 software internships. Experienced in C#, ASP.NET MVC, X++, SQL Server, and Microsoft Power Platforms. Delivered CRM customizations, ERP reports, and internal management systems used in production.

EDUCATION

B.S. (Computer Science), *DHA Suffa University (3.37/4.00 GPA)* 10/2022 – 07/2026

H.Sc. (Pre Engineering), *Adamjee Govt. Science College* 10/2020 – 06/2022

SKILLS

- C#
- Python
- Java
- Javascript
- Dynamics 365
- ERP
- Microsoft SQL Server
- Visual Studio
- .NET
- X++
- Microsoft Power Platforms
- APIs

CERTIFICATIONS

- Microsoft Dynamics CRM & Power Platforms - MazikGlobal & SMIT
- Databases and SQL for Data Science with Python - IBM
- Introduction to Artificial Intelligence - Google
- C# - Hacker Rank

EXPERIENCE

Microsoft Dynamics 365 Finance and Operations Developer (Part-Time), *Hull Technologies* 10/2024 – 07/2026

- Wrote X++ code joining multiple tables and applying business calculations into matching report columns, replacing manual Excel consolidation.
- Built a data entity for Excel-based bulk import of master data, cutting manual record entry during client onboarding.
- Configured multi-level approval workflow for a finance process, routing submissions automatically instead of by email.
- Diagnosed a production data defect by tracing fields from form to table using table browser and debugger, then patched the source logic.

Software Development Intern, *Pakistan Atomic Energy Commission* 08/2026 – 09/2026

- Conducted vulnerability testing on FPIS across authentication, input validation, and access control, resolving several issues before deployment.
- Authored installation guides and technical documentation for FPIS, reducing repeat support requests during rollout.
- Developed Paper Ream Management System with employee records and multi-level admin approval, replacing manual spreadsheet tracking of A3/A4 stock.
- Engineered PDF Document Management System with scan, upload, CRUD, and metadata search, centralizing 100+ documents into one searchable repository.

Software Development Intern, *Orient Energy Systems Pvt Ltd* 08/2025 – 10/2025

- Automated CRM email notifications in MVC .NET, eliminating manual sending and ensuring on-schedule delivery.
- Built dynamic salespersons grid with department-wise listing, CRUD, and search, reducing record lookup from minutes to seconds.
- Optimized SQL stored procedures generating weekly and monthly email reports, converting a manual compilation task into a scheduled job.
- Developed a WhatsApp chatbot in Python using Meta WhatsApp Cloud API and Ngrok, automating replies through interactive menu-based responses.

PROJECTS

EhsaasPay , *(Final Year Project)* 10/2025 – 07/2026

A Flutter-based charity and donation platform designed to verify donation requests before they reach donors, ensuring a secure and transparent donation process.

- Implemented CNIC-based registration with phone OTP verification and a 4-digit MPIN for secure donation access.
- Integrated Google ML Kit OCR for on-device CNIC and supporting-document verification.
- Implemented Stripe test-mode payments, push notifications, and an admin approval workflow.
- Developed a standalone admin panel for reviewing requests and monitoring organization statistics.
- **Technologies:** Flutter, Firebase Authentication, Firestore, Stripe, Google ML Kit

AI Email Assistant 07/2026 – 07/2026

An AI-powered email assistant that reads emails, understands their intent, and generates intelligent reply drafts.

- The application analyzes incoming emails, extracts key context, and creates personalized responses for user review.
- Emails are only sent after user approval, ensuring accuracy and complete control.
- **Technologies:** Python, Gmail API, Google Gemini API, Streamlit

Point of Sale System 09/2024 – 09/2024

A Windows application to handle sales transactions, inventory, and customer data for retail stores.

- Learned to design user-friendly interfaces and manage real-time data operations like billing, stock updates, and reporting.
- **Technologies**: Visual Studio, C#, Microsoft SQL Server
